Skills

React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS/SASS, Redux, Redux-toolkit, RESTful APIs, Responsive Web Design, Git, GitHub, Webpack, Babel, Unit Testing (Jest), Agile Methodology

Experience

Software Engineer | Capgemini India | Mumbai | April 2021 - Present

- Currently engaged with Japanese client Sentinel Healthcare in the project aimed at systemizing medical device information.
- Technologies: React JS, JavaScript, HTML5, ag-grid-react, Styled-Components, Git, AWS, Postman, RTL etc.
- Contributed to the development of an Energy Manager solution for a US-based Automation client. Additionally, participated in the 5G Hive project to construct their landing page with a config-driven UI style.
- Technologies: ReactJS, JavaScript, Redux-thunk, formik, Sass and Grommet.io, Charts.js, CSS3, Jest, Postman, Azure Devops, Git.

Responsibilities:

- Collaborated with client UX teams, translating requirements into reusable and responsive React components.
- Fixed front-end bugs using different debugging tools.
- Wrote unit test cases and stability tests for device scalability.
- Demonstrated proficiency in SDLC, Agile methodology, and version control systems.

Projects

Google Meet Clone | Next.js 13, ReactJs, Socket.io, PeerJs, Tailwind | GitHub

- Implemented real-time video and audio communication in a Google Meet clone using Next.js, React.js, Socket.io, and PeerJS.
- Designed a responsive UI with Tailwind CSS, facilitating optimal virtual meetings and seamless peer-to-peer communication.

Movie Hub | ReactJs, React-Router, Material-UI, CSS3 | GitHub | Live

- Developed a responsive ReactJS web app to explore trending movies and TV series, showcasing detailed information and cast details.
- Implemented Axios to fetch real-time movie data from the TMDB API, enhancing the application's dynamic content delivery.

Education

Bachelor of Engineering: E&TC | Jawaharlal Nehru Engineering College | Aurangabad | 2017 - 2020
